Sandigan forfeits \$8 M Swiss deposit

OSG presses US custody for Smith

By Arnold N. Brown

THE COURT OF APPEALS has ruled in favor of the Sandiganbayan, ordering the Office of the Solicitor General (OSG) to press for the custody of the Smith family's \$8 million Swiss deposit. The court's decision is a significant victory for the Sandiganbayan, which has been fighting the OSG's attempt to claim the deposit for the Smith family.

The Sandiganbayan, the Philippines' anti-graft court, had previously ruled in favor of the Smith family, ordering the OSG to return the deposit. The OSG, however, had appealed the decision, arguing that the deposit was the property of the Philippine government.

The court's decision is based on the fact that the Smith family had deposited the money in a Swiss bank account. The court found that the deposit was the property of the Smith family, not the Philippine government.

The OSG, however, had argued that the deposit was the property of the Philippine government. The court, however, found that the Smith family had deposited the money in a Swiss bank account, and that the deposit was the property of the Smith family.

Growth for whom?

THE PHILIPPINE ANNUAL GROSS DOMESTIC PRODUCT (GDP) growth rate for 2011 is projected to be 7.5 percent, up from 7.1 percent in 2010. This is a significant improvement over the 6.7 percent growth rate in 2009.

The bank's outlook is positive, but it also notes that the growth rate is still below the target of 8 percent.

EDITORIAL

It is good to see that the economy is growing, but the question remains: Growth for whom?

The growth rate is a good indicator of the health of the economy, but it does not tell the whole story.

We need to look at the distribution of income and the quality of jobs created.

Debit cards: Alternative to queueing at ATMs

Banks urge customers to swipe their cards at stores instead of withdrawing cash

By Dave C. Osorio

It's a common sight in the Philippines: A long line of people waiting at an ATM to withdraw cash. But what if there was a way to avoid the queue? The answer is yes, and it's called a debit card. Banks are now encouraging customers to use their debit cards at stores instead of withdrawing cash from ATMs. This is because using a debit card at a store is faster and more convenient than waiting in line at an ATM. Additionally, using a debit card at a store can help you keep track of your spending more easily. Many banks also offer rewards programs for customers who use their debit cards frequently. So, next time you're at a store, consider using your debit card instead of withdrawing cash. It's a simple switch that can save you time and money.

Using a debit card at a store terminal is a faster and more convenient way to make purchases compared to withdrawing cash from an ATM.

Debit cards are becoming increasingly popular in the Philippines, and for good reason. They offer a convenient and secure way to manage your money. Unlike credit cards, debit cards are linked directly to your bank account, so you can only spend the money you have. This makes them a safer option for many people. Additionally, using a debit card at a store can help you avoid the hassle of carrying large amounts of cash. Many banks also offer additional benefits for debit card users, such as travel insurance and fraud protection. So, if you're looking for a more convenient and secure way to spend your money, a debit card might be the right choice for you.

SBC No filing fees for additional corporate contributors

By John Peter Cardenas & Richard

The Securities and Exchange Commission (SEC) has announced that it will no longer charge filing fees for additional corporate contributors to the Philippine Stock Exchange (PSE). This move is intended to encourage more companies to list on the PSE and to increase the liquidity of the market. The SEC has stated that this change will be implemented starting from the first quarter of 2003.

The SEC's decision is a significant step towards making the PSE more attractive to investors. By removing the filing fees, the SEC is reducing the cost of listing for companies, which can help them to raise more capital. This is particularly important for small and medium-sized enterprises (SMEs), which often face higher costs than larger companies. The SEC hopes that this change will lead to a more vibrant and active stock market in the Philippines.

The SEC's decision is also in line with its broader goal of improving the corporate governance and transparency of the PSE. By encouraging more companies to list, the SEC is increasing the number of companies that are subject to its regulations and oversight. This can help to ensure that the PSE remains a fair and efficient market for investors.

The SEC's decision is a positive development for the PSE and for the Philippine economy as a whole. It shows that the SEC is committed to making the PSE a more attractive and accessible market for investors. This can help to promote economic growth and development in the Philippines.

Cheap SEA property lures Japanese retirees

Many Japanese retirees are flocking to the Philippines, drawn by the low cost of living and the warm climate. They are particularly interested in buying property in the Philippines, which is seen as a safe and profitable investment. The Philippines offers a wide range of property options, from small apartments to large villas. Many retirees are also attracted to the Philippines because of its rich culture and beautiful scenery. They enjoy the local food, the friendly people, and the beautiful beaches. The Philippines is becoming a popular destination for Japanese retirees, and this trend is expected to continue in the future.

The chemical synthesis of the monomers is conducted in bulk in the presence of a homogeneous catalyst. The polymerization of the diethyl acrylate monomer is more sensitive to the reaction conditions than the other vinyl monomers.
